GLOBAL FUND SUCCESS STORY #427

In Ethiopia, Awetash is living with HIV. Her three-year-old daughter, Tigst, was born HIV-free because of a Global Fund-financed program that delivers prevention of mother-to-child transmission services.

The Global Fund: Five Million Lives Saved in 140 Countries.

Although there are many success stories, the fight is not yet won.

The Global Fund is a smart investment. For every \$1 the U.S. government contributes, the Global Fund leverages \$2 from other donors, multiplying U.S. investment worldwide.
